3pop is a full service, technology consulting firm specializing in innovation and the implementation and support of Microsoft and Linux based server solutions for business. We provide a wide variety of traditional business technology support services including: file and e-mail servers, wired and wireless networking and network architecture, virtual private networking, remote access, Internet domains, web development and hosting, eCommerce, handheld technologies and much more. We specialize in technological innovation and offer many solutions to improve your workflow and reduce your operating costs.

We also offer several signature services available only from 3pop: the [3popbox\(sm\)](#) Network Micro-Server, [FilesOffSite\(sm\)](#) Automatic Offsite Data Backups, and [MailWhacker\(sm\)](#) Anti-Spam and Anti-Virus Filtering for Email.

### 3pop Signature Services

3pop is the home of the new **3popbox(sm) Network Micro-Server**--a powerful addition to any network. The 3popbox(sm) provides a comprehensive suite of business services to augment existing Windows Server-based networks or it can function as your network's primary server without the expense of a traditional Windows Server. The 3popbox(sm) suite of services includes:

- [FilesOffSite\(sm\)](#) Automatic Offsite Backups of all your business critical data
- Comprehensive Email hosting with [Mailwhacker\(sm\)](#) Anti-Spam/Anti-Virus Filtering
- Enterprise Class Virtual Private Networking and Firewall Services
- Web, File, and Print Services, DNS, DHCP, and virtually all other traditional network services
- Enterprise-Wide PDF Printing--if you can print it, you can PDF it
- Active Directory Integrated Network Attached Storage for secure storage and access to public and private files
- Optional Terminal Server Integration for Remote Desktop access to all of your data
